POLYETHYLENE PLATE

- Polyethylene plate access and ground protection mats provide access and traction over sand, mud, marshy areas and protect your personnel, equipment, vehicles and turf.
- Use Polyethylene plate to create temporary roadways for vehicles, trucks and equipment or large work pads for drilling, administrative compounds, bone yards, temporary flooring and other industrial applications.
- Polyethylene plate are easy to install, transport and maintain. Mats are rugged and durable - each standard mat can support up to 80 tons (static load).
- Use Polyethylene plate portable roads to get heavy work equipment to a job site, while protecting the ground and your turf.

ITEMS	MODEL	PP1224
POLYETHYLENE PLATE	Dimension (mm)	2,440 x 1,220 x 12.7
	Bending Elastic Force (MPa)	1,280
	Weight (kg)	39
	Withstand Load (T)	80 (20cm x 20cm)

ITEMS	MODEL	TYPE 1	TYPE 2
STEEL PLATE	Dimension (mm)	6,000 x 1,500 x 22	6,170 x 1,858 x 17
	Weight (tons)	1.55	1.53
